

SAS JOINS GREEN HYDROGEN PARTNERSHIP IN NORTHWEST EUROPE

Today, SAS joins a collaboration between Danish green hydrogen producers and Dutch industrial markets, in the presence of His Majesty the King Willem-Alexander of the Netherlands, His Majesty King Frederik of Denmark, Dutch Deputy Prime Minister and Minister for Climate Policy and Green Growth Sophie Hermans, and Danish Minister for Climate, Energy and Utilities, Lars Aagaard.

The partnership was formalized by signing a declaration at the Dutch-Danish Forum on hydrogen cooperation at the premises of Danish Industry.

This cross-country initiative aims to establish Northwest Europe's leading green hydrogen cluster, bridging Danish production with Dutch demand. By enhancing green hydrogen infrastructure, the collaboration seeks to boost demand, advocate for government support, and secure funding to make green hydrogen a competitive energy source across the region.

SAS is committed to playing a key role in driving this sustainable transformation, partnering with stakeholders to drive progress toward a more sustainable future for aviation.

"We're very excited and proud to join forces in this green hydrogen partnership, which brings us closer to a sustainable future for aviation. If Europe is to meet its climate goals and strengthen energy security, public and private sectors as well as countries must work together to build a strong green hydrogen market. We're committed to doing our part to help drive real progress", says SAS President & CEO, Anko van der Werff.

SAS, Scandinavia's leading airline since 1946, operates from its principal hub at Copenhagen Airport (CPH), complemented by hubs in Oslo (OSL) and Stockholm (ARN). Our mission is to connect Scandinavia with the world and the world with Scandinavia. Each year, SAS serves more than 25 million passengers and transports 60 000 tons of cargo to 135 destinations across Europe, the USA, and Asia. With a passionate workforce of over 10,000 colleagues, we collaborate with partners and customers to drive transformative changes in aviation. We are committed to achieving net-zero emissions by 2050, embodying the visionary spirit of our founders: "To move from the old to what is about to come, is the only tradition worth keeping". Innovation and societal progress are at the heart of everything we do. SAS joined SkyTeam in September 2024 and together with our partner airlines we offer a wide network worldwide.
